

# Making Data for Good a Reality

**A story of collaboration**

# What is the Data for Children Collaborative with UNICEF?

The Data for Children Collaborative with UNICEF is a unique partnership between UNICEF, The Scottish Government and the University of Edinburgh, hosted by The Edinburgh Futures Institute.

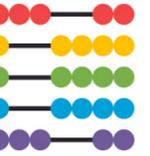

Our mission is to provide the platform that brings together the appropriate data and expertise to improve outcomes for every child.

We enable and deliver collaborations between academics, the private sector and the public sector.

**We are dedicated  
to using data  
responsibly to  
improve  
outcomes for  
every child.**

# What we do

**We bring together expertise and data from our community to address complex problems facing children**

**We work with a range of partners, including UNICEF, to identify demand-driven challenges that require a data-driven solution.**

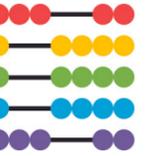

**All our projects are child-focused and are designed to support one or more of the Sustainable Development Goals**

# What we work on

We work across seven priority themes with eleven active projects

We are currently working in eight countries and have four projects tackling global issues.

Poverty

Population

Nutrition

Mental Health

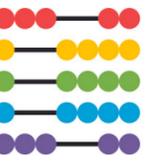

COVID-19

Climate Change

Ad Hoc

# How we build our teams

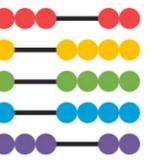

Our Impact Collaborations Process

and to help us make positive impacts

We build a question...

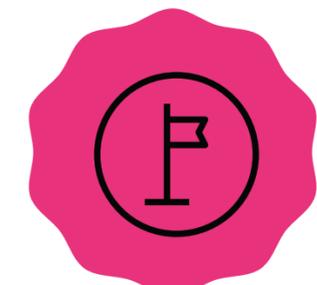

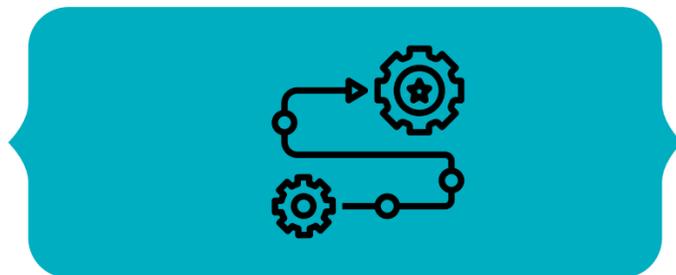

Our community express an interest...

We co-create a project...

We build a collaboration...

# How we work

We have developed a Responsible Innovation Framework to ensure our projects are carried out in a trustworthy, transparent and safe way, for every child.

## Prioritisation Framework

Are we best placed to answer this challenge?

## Project Initiation Document (PID)

Who, what, when, how does the project work?

## Governance Approval

Do the partner organisations support this initiative?

## Legals at a Glance

What have we all signed up to?

## Safeguarding Training

What are our responsibilities towards every child?

## Ethical Assessment

Are we doing the right thing in the right way?

## Youth Participation

How do we meaningfully engage young people?

## Impact Statement

What did the project achieve, and what lessons have we learned?

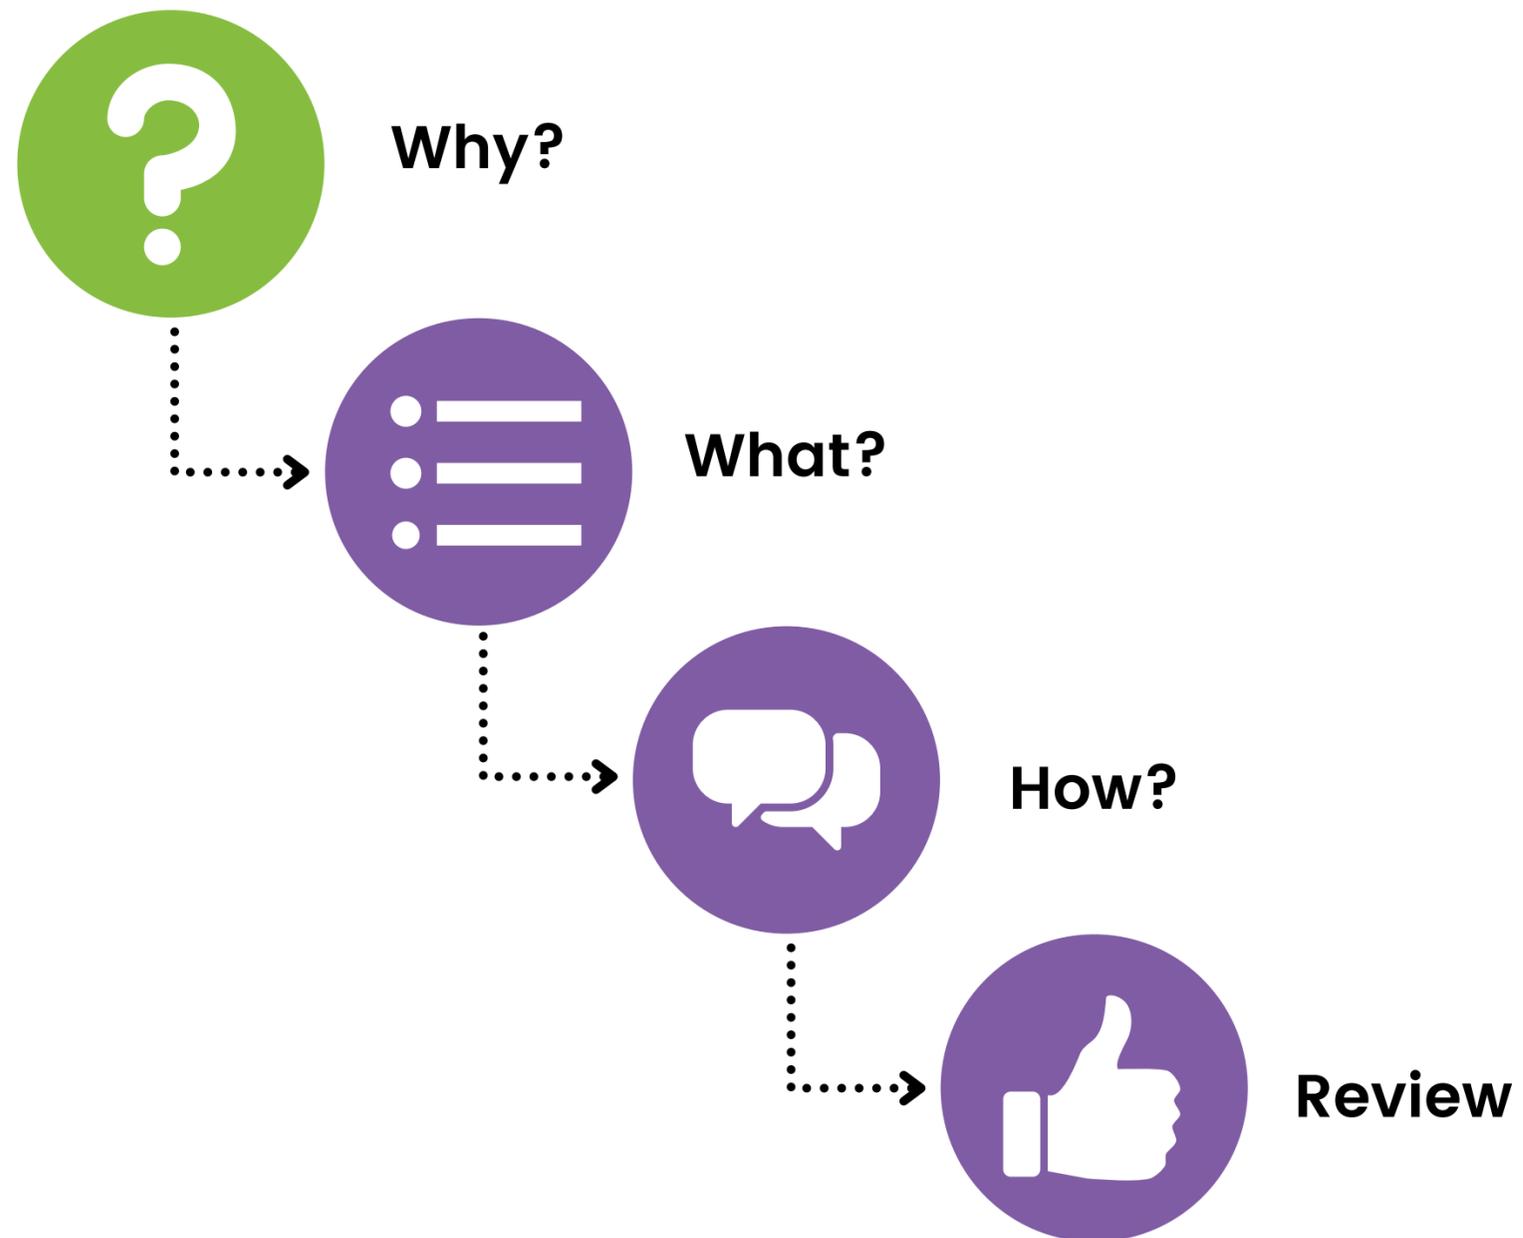

## Ethical Assessment:

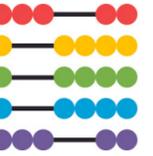

- Designed a bespoke ethical framework made up of a compass, roadmap and highway code
- Ethics assessment is a collaborative effort completed across specialisms
- Assessments occur at the start, middle and end of the project to account for change
- Must be recognised as a value add process – not a tick box exercise or admin burden

# Youth Participation

# Two Case Studies

Poverty

Population

Nutrition

Mental Health

COVID-19

Climate Change

Ad Hoc

# The Climate Crisis is a Child's Rights Crisis

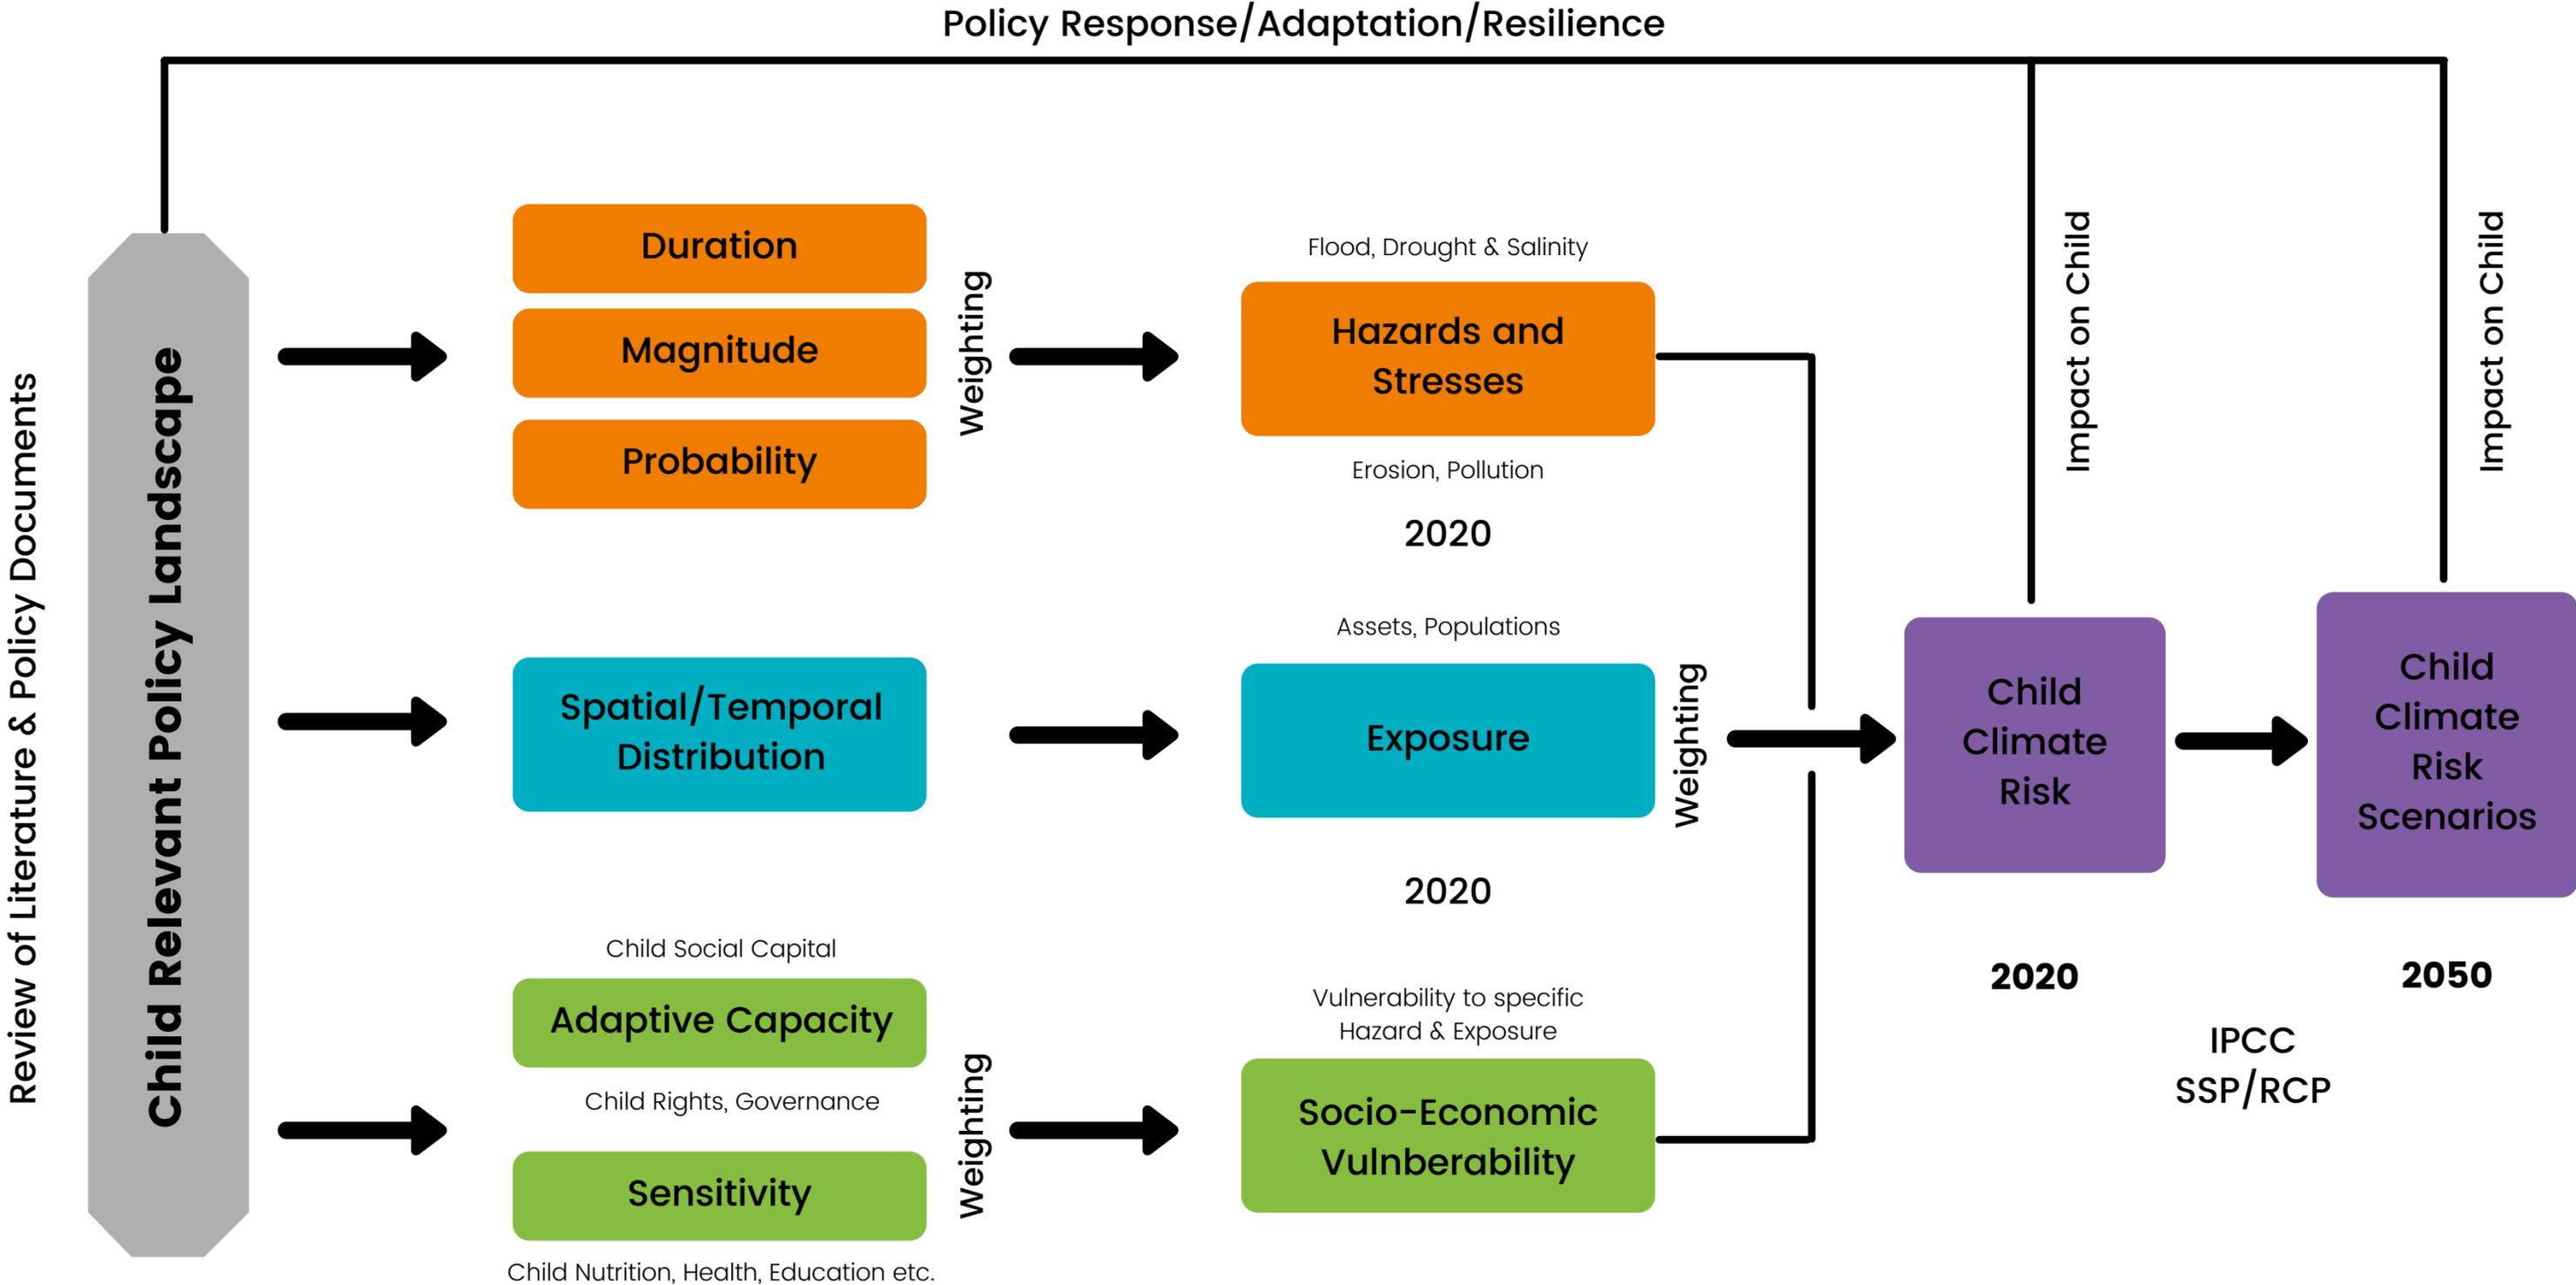

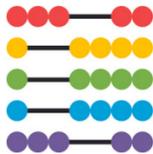

**Building the Children's Climate  
Risk Index**

**Children are more vulnerable to climate and environmental shocks than adults.**

# Child Climate Risk Index

# How has working with the Collaborative helped this project?

---

## Expertise

- Multidisciplinary approach supported by diverse experience
- Expertise in social context of child vulnerability, social statistics, biophysical process and statistics, project management, child welfare and poverty issues

---

## User Need

- Balancing the trade-off between stakeholder representative needs and statistical academic rigour in index development

---

## Community

- Building relationships and a core team for important future work in this space
-

# Making Invisible Children Visible

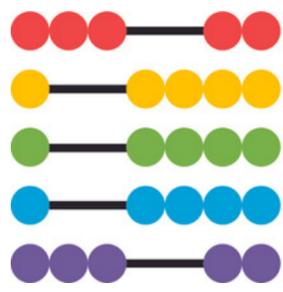

The image shows a YouTube video player interface. At the top left, the logo for 'Data for Children Collaborative WITH UNICEF' is visible, with the text 'Population Estimation Project' above it. The main title of the video is 'Making Invisible Children Visible', displayed in white text on a teal rounded rectangle. Below the title, a subtitle reads 'Sustainable Census-Independent Population Estimation' in white text on an orange rounded rectangle. At the bottom left of the player, there is a 'Watch on YouTube' button. On the right side of the video frame, there are 'Watch later' and 'Share' icons. The video content itself shows a group of five young children standing outdoors on a dirt path. They are dressed in simple, colorful clothing. Some children have their hands on their heads, and one child in the foreground has their hands clasped in front of their face. The background shows some greenery and a building.

# Key Messages

- 1 Your skills are not limited to your current sector or field of work – they have value elsewhere
- 2 Working with expertise from different backgrounds will make for new growth and development, both individually and for your organisation
- 3 Working on Data for Good projects will increase your ethical literacy, that can be taken back to the workplace
- 4 We all want to make a positive impact on society!
